New Eagle Pest Control

No.90/7/A/9, Mohan Jayamaha Mawatha, Seeduwa Road, Kotugoda.

Tel : 011-2238890, 077-0666598, 071-2388898

Our Vision

To render our services to the entire satisfaction of the client and to fulfil the requirements of him/her meeting the deadlines and exploring the new dimensions of the fields.

Our Mission

To carry out our services adhering to all legal requirements and environmental regulations, giving the foremost priority to the requirement of the client.

Our Motto

Duty & clients are the first negotiable is the rest.

Introduction

INTRODUCTION

We M/s. New Eagle Pest Control Services are providing the following services since 2003, effectively and at competitive rates, through our well equipped and skilled staff including Entomologists (scientists dealing with insects) Horticulturists and Civil Engineers in the main cities like Colombo, Kandy, Galle, Negombo, Matale ect.

OUR MAIN SERVICES:

We dutifully and with fullest responsibility undertake the following services :

- ☆ Termites Control
- ☆ Rodents Control
- ☆ Garden and Lawn Treatment
- ☆ Landscaping, Green Houses services
- ☆ Overall pest control in households institutional premises.

VALUED CLIENTS:

We are providing pest control services to many Government organizations such as Armed Forces Messes Buildings, Local and Foreign Banks, Business organizations, etc.

SAFETY FOR HUMANS:

These chemicals are of special nature and formulations, which are registered for use in houses and public places by W.H.O.(World Health Organization) EPA, Public Health Authorities are very safe for environment and human beings. They are also Odorless, Colorless Non-Irritant Highly effective, environment friendly.

REGISTRATIONS:

We are registered in Department of Agriculture office of the registrar of Pesticides Sri Lanka.

About the Chemical

FMC Corporation has operated as one of the world's leading producers of chemicals for industry, agriculture and speciality applications for more than 120 years with its headquarter at Philadelphia, USA. FMC Specialty Products serve as the first line of defense against pests that attack important sources of food, destroy shelter or diminish the quality of human life in more than 80 countries across the globe. We combine state-of-the-art facilities with technical expertise to create innovations for professional and specialized pest control situations. Biflex TC is the result of years of such efforts of our scientists in Princeton, USA.

Biflex TC is a synthetic pyrethroid modeled on mother nature's very effective insecticide pyrethrum which is extracted from the Pyrethrum Daisy. Bifenthrin, the active ingredient in Biflex TC is used in several countries to control a variety of pests like termites, ants, cockroaches, mosquitoes, spiders, chinch bugs, fleas, flies, wasps and more. It is also used extensively to protect wood against wood damaging insects like termites and borers.

Biflex TC is the most advanced development in today's growing world of termiticides. Based on a unique pyrethroid called bifenthrin, Biflex TC brings unequalled levels of termiticidal activity. Furthermore, Biflex TC also provides significant improvements to the health and safety of both the Pest Control Applicators and the Homeowners. Biflex TC protects with responsibility. These important benefits of Biflex TC are due to the unique characteristics of the bifenthrin molecule and represent the most significant breakthrough in termite control since the introduction of the organochlorines some 50 years ago.

Biflex has been thoroughly tested in areas of severe termite pressure globally and is the most widely used termiticide in its class - used around the world in several countries including the United States of America, Australia, and Japan. The product has also been extensively tested and recommended in India by the Central Building Research Institute(CBRI), Roorkee, for Pre-Construction and Post-Construction anti-termite treatment.

Human and Environmental Safety of chemicals used

We adhere to integrated pest management methodology where the minimum quantities of chemicals are used to achieve the highest level of pest control objectives. We advise the customer on better house keeping methods and we carry out pest monitoring system and feedback. The chemicals we use are all WHO recommended safe to the public health pesticides that are applied with maximum care in order to minimise the health risks. Our technical team are well experienced, highly trained, and qualified for household and Industrial pest control operations. The Material safety data of chemicals and other information could be provided upon the client's request.

Timber Treatment

Timber is required for buildings where the concrete floor slab has been laid without prior application of termiticide to create treated soil barriers. The only way to create treated soil barriers post construction is by injecting the termiticide into the soil below the floor slab through a set of drilled holes close to the foundation footings (wall floor junction area). In this process your floor has to be drilled at intervals of 1 – 2 (according to the requirement) foot near the walls where necessary.

The uniformity of the chemical barrier cannot be precisely determined and therefore there is a risk of re-infestation compared to preconstruction treatment. The process is also relatively more expensive than preconstruction treatment as it is more time consuming and a larger quantity of chemicals are required, however it is the only remedy for post

කැපොත්තන් සහ කුහුඹුවන් මර්ධනය

ඔහැනොපොස්පේට් / කෘතිම පයිරෙත්රොයිඩ රසායනික වර්ගීකරණයන්ට අයත් කෘමිනාශක භාවිතය මගින් මෙම කැපොත්තන් සහ කුහුඹුවන් මර්ධනය සිදු කෙරේ.

කෘමි නාශක භාවිතා කරන ආකාරය

ආරම්භයේදී එම කෘමීන් බෝවන ස්ථාන, බහුලව සිටින ස්ථාන හා සැලව සිටින ස්ථාන හඳුනාගෙන ආරක්ෂාකාරී ලෙස කෘමිනාශක ඉසිනු ලබයි. මින් දැනට සිටින කෘමි සතුන් මර්ධනය වන අතර රසායනික ද්‍රව්‍ය වල අවශේෂ මගින් සති 1 සිට 6 දක්වා කාලයක් යන තුරු සතුන් මර්ධනය වේ. ඉන් පසු දීර්ඝ කාලීනව කෘමීන් මර්ධනය කිරීම පවත්වා ගැනීමට අවශ්‍යය වූ විට මෙම කෘමිනාශකය ඉසිනු ලැබේ.

ඔබ විසින් අනුගමනය කළ යුතු ආරක්ෂක පිළිවෙත්

කෘමි නාශක ඉසීමට ප්‍රථම

- ★ ආහාර පාන, සංවේදී උපකරණ ආවරණය කර තබන්න.
- ★ කුඩා ළමුන් හා රෝගීන් සිටි නම් තාවකාලිකව බෙහෙත් ඉසින ස්ථානවලින් ඉවත් කර තබන්න.
- ★ සුරතල් සතුන් හා මාලු ටැංකි ඇත්නම් ආරක්ෂිත ස්ථානවල රැඳවීම හෝ මාලු ටැංකි වසා තැබීම වැදගත් වේ.
- ★ මුළු තැන්ගෙයි බඩුබාහිරාදිය අසුරා ඇති කඩඩ් වැනි දෑ අස්කර තැබීමෙන් වඩා ආරක්ෂාකාරී ලෙස එම ස්ථානවලට කෘමිනාශක ඉසිය හැක.

කෘමි නාශක ස්පර්ශ වුවහොත්

- ★ ඇද සිටින ඇදුම්වල කෘමිනාශක ස්පර්ශ වී ඇත්නම් එම ඇදුම් ඉවත් කරන්න.
- ★ කෘමිනාශක ස්පර්ශ වී ඇති ස්ථාන ජලය යොදා සෝදා හරින්න. එම ස්ථාන නැවත වරක් සබන් යොදා ජලයෙන් සෝදා හරින්න.

Control of cockroaches and ants this control is done by engaging the insecticides of carbamates/ pyrethroide category

Method of Use

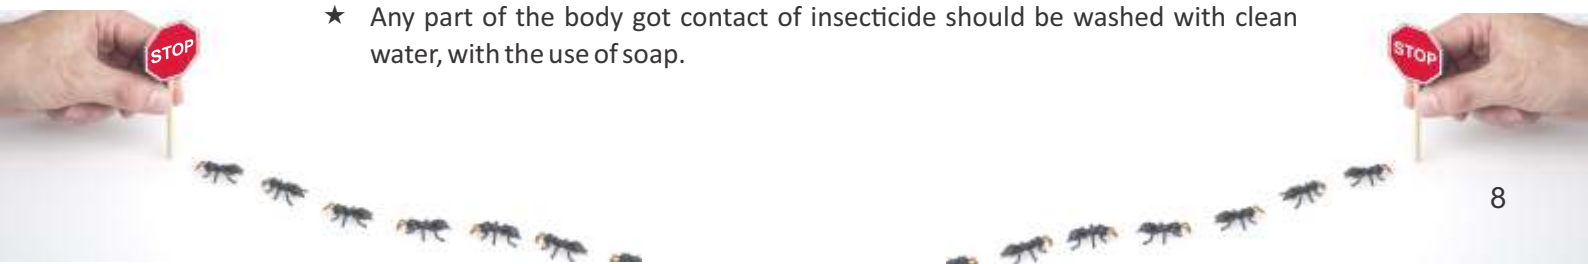

At the starting point, breeding grounds, locations of abundance , and areas the insects are hiding are identified to apply insecticides safely. it will suppress the existing population and reside will keep effect up to 1-6 weeks. After that, the same chemical will be spread to maintain long lasting control of insects.

Precautions to be taken by the customer before spraying

- ★ Food material and sensitive equipment to be kept under cover
- ★ Keep away the kids and patients temporality.
- ★ it's important to keep pets away and fish tank under cover
- ★ Emptying the cupboards of the kitchen, will make the spraying procedure safer.

POISON ON THE SKIN

- ★ Remove any contaminated clothing
- ★ wash the affected area again and again, with the use of soap
- ★ Any part of the body got contact of insecticide should be washed with clean water, with the use of soap.

මියන් මර්ධනය

මී නාශක විවිධාකාරයේ විෂ මට්ටම් රසායනික සංයෝග වන අතර මේවා නිපදවා ඇත්තේ විශේෂයෙන්ම මියන් මර්ධනය සඳහා වූවත් වෙනත් සතුන්ට මෙන්ම මිනිසුන් හටද විෂ සහිත විය හැක. මියන් මර්ධනය සඳහා අප විසින් "පේන්ට්‍රෝල්" යන වෙළඳ නාමයෙන් හදුන්වනු ලබන ඩයිජේම් හැකුම් 0.005 % ක්‍රියාකාරී රසායනික ද්‍රව්‍යය අඩංගු මිනාශකය භාවිතා කරනු ලැබේ.

මිනාශක භාවිතා කරන ආකාරය

මියන් මර්ධනය සඳහා මිනාශක සෘජුවම භාවිතා නොවේ. මේවා මියන් ආහාරයට ගන්නා ධාන්‍ය වර්ගයක් සමග කලවම් කොට හා මියන්ට ආහාරයට ගත හැකි ඉටි ආලේපිත කැට විශේෂයක් ලෙස සැකසූ ඇමක් ලෙස මියන් බෝවන ස්ථාන හා නිතර ගමන් ගන්නා මාර්ග වල තබනු ලැබේ. උපරිම ප්‍රතිඵල ලබා ගැනීම සඳහා ආරක්ෂිත ස්ථාන වල නියමිත කාල සීමාවක් තුල (උදා :- මසකට වරක්) ඇම තැබිය යුතුය.

ඔබ විසින් අනුගමනය කල යුතු ආරක්ෂක පිළිවෙත්

- ★ කුඩා ළමුන් හා ගෙදර ඇති කරන සුරතල් සතුන් කෘමිනාශක කරා ලගා විය හැකි මාර්ග අවුරා තබන්න.
- ★ මිනාශක ආහාර පාන ද්‍රව්‍ය සමග මිශ්‍ර වීමට ඇති ඉඩකඩ අවුරා තබන්න.
- ★ විනාශක සහිත ඇමවල් තැබූ ස්ථානවල සුරක්ෂිතව තිබේදැයි නිතර පරීක්ෂා කර බලන්න.
- ★ ඇමෙහි ඇති ධාන්‍ය ඉන් පිටතට විසිරී ඇත්නම් ආරක්ෂිතව පිරිසුදු කරන්න.

මී කුණක් දුටු විට

Control of Rats / Mice

Rodenticides are chemical compounds with various levels of toxicity and although they have been formulated specifically for Rats/ mice control they can be poisonous for pets as well as humans.

For control of rat/mice, we use the chemical with the trade name centrol, which has defenacoum 0.005% as the active ingredient.

Method of use

These rodenticides are not directly used for the control of rodents they are mixed with a grain preferred by the Rats/ mice or formulated as wax coated bait to keep on their routes and niches. for more effective results baiting should be done, in (ex: ONCE IN A MONTH)

Precautions to be taken client

- ★ Block the reach of kids, and pets to the rodenticide.
- ★ Do not let the rodenticide get mixed with food and beverages.
- ★ often inspect, if the baits are in places where they were placed.
- ★ If the grains have been spilled out, clean them in a safe manner.

When a carcass of a Rat/mouse is found

- ★ Never feed it to another animal.
- ★ Do not put it in the garbage bin or garbage pit
- ★ Bury it in a deep pit or burn it as soon as possible.

In case of poisoning

- ★ Never try to induce vomiting by putting the finger in to the mouth
- ★ Take the patient to the nearest hospital as soon as possible

IN CASE OF AN EMERGENCY IMMEDIATELY CALL THE FOLLOWING CONTACT PHONE NUMBERS

National poisons information centre
